

# Juzo compression products

Quality "Made in Germany"

Juzo compression knits have been awarded the "Oeko-Tex Standard 100" textile certification. This ensures that all product parts are safe for human use and do not pose a health hazard. We also deliberately avoid additives such as silicone or other plasticisers to ensure the products are kinder to your skin and resources are used in an environmentally friendly way. The compression products are produced according to the strict "Made in Germany" quality standard at the Aichach (Bavaria) site in Germany. In order to meet all manner of different patient requirements, Juzo's production facility combines the latest technology with artisan techniques.

Freedom in Motion

## Juzo Move – Unique. Simple. Efficient.

### Patented knit for easy donning and doffing

Juzo Move offers effective compression therapy as well as maximum comfort. The new patented knit allows you to glide the stocking over your foot with no problems whatsoever – making it particularly easy to don and doff.

### Pleasant wearing comfort and a high working pressure

The high microfibre content ensures the stocking is comfortable to wear and the skin climate is balanced, while the short-stretch material reduces slippage. The high working pressure offers optimal support for an active day-to-day life. The unique functional zone in the instep area minimises cutting in, even when the foot is positioned at 90 degrees. Juzo Move thus offers pleasant wearing comfort for people in wheelchairs too.

### Functional properties and adjustability

The special fabric knit in the forefoot region ensures a sturdy covering, while the larger heel favours easier handling and better adjustability. Thanks to its functional properties, Juzo Move compression stockings provide real therapeutic relief for any patient and makes moving more fun.
