

FASCIQ®

FASCIQ® Pre-Tape Spray

FASCIQ® Pre Tape Spray increases adherence between tape and skin.

Benefits of Pre-Tape Spray includes:

- ✓ Strong adherence to skin without irritation
- ✓ Easy spray-on adhesive gives sports tape and wraps more stick
- ✓ Use to secure tapes & strapping to make tape jobs last longer
- ✓ Water resistant adhesive for better hold in wet weather
- ✓ Dries in a colourless film: invisible once applied
- ✓ No propellants in the product
- ✓ Most eco-friendly alternative to existing aero sprays on the market

Useful for most skin types (including greasy or sweaty skin) where tapes need to be applied, the FASCIQ® Pre-Tape Spray creates a tacky/sticky surface which helps improve tape adherence and add security to wraps or tapes. With more water resistance than the adhesive on most tapes, this makes it ideal for applying to areas that are prone to be more wet/sweaty or dirty.

Supplied in 200ml spray bottles the FASCIQ® Pre-Tape Spray uses a pump system (transport friendly) with its alcoholic content acting as a skin cleaner and providing antiseptic protection to the skin without discolouration.
