CureTape® Punch

Materials: Elastic cotton with a breathable, hypoallergenic acrylic adhesive.

Dimensions: Roll: 5 cm x 5 meters

Displaybox: 6 rolls

Available colours: 

Due to the unique hole pattern, this tape has a greater stretching capacity and the working direction is three-dimensional. The skin and fascia receive much more signals due to the pressure differences that arise around the hole pattern. The skin also has more opportunity to ventilate.

CureTape® Art

Materials:	Elastic cotton with a breathable, hypoallergenic acrylic adhesive.
Dimensions:	Roll: 5 cm x 5 meters
Displaybox:	6 rolls
Available colours:	

The Art variant is a real eye-catcher with its modern, colourful prints; versatile, skin-friendly and meets the highest quality requirements. The various prints can be beautifully combined with the uni colors of CureTape Classic. CureTape Art has the same composition and adhesive strength as CureTape Classic and is also water resistant. CureTape Art is the only kinesiology tape manufactured using a unique printing process, in which the dye is completely incorporated into the fibres and does not lie on them. This keeps the cotton smooth, elastic and comfortable to the touch.

About CrossLinq®

CrossLinq® are non-elastic, grid-shaped tapes that are produced in our own factory in South Korea. CrossLinq has a skin-friendly acrylic adhesive layer. These tapes are mainly used on (local) pain points, trigger points and acupuncture points.

When applying to pain points you can easily apply the CrossLinq® yourself, however, application to trigger points and acupuncture points requires specific knowledge.

CrossLinq® Patches

Materials:	Non-elastic, self-adhesive, waterproof, grid-shaped patches with a skin-friendly acrylic adhesive layer.
Dimensions:	Small: 1.4 x 1.8cm: 20 sheets x 12 crosslings Medium: 2.1 x 2.7cm: 20 sheets x 8 crosslings Large: 4.4 x 5.2cm: 20 sheets x 2 crosslings

CrossLinq® Book

The CrossLinq handbook contains more than 100 practical examples of treatment, 364 pages with clear explanations of the method, and high-quality photos of all treatments. The handbook also contains the latest insights and provides a total overview of the applications that are possible with CrossLinq, conveniently in alphabetical order of the conditions. CrossLinq is used on (local) pain points, trigger points, and acupuncture points. CrossLinq tapes are grid-shaped, electrostatically charged tapes that remove blockages, reduce or even remove pain and ailments, painlessly and without medication.

ABOUT CURETAPE®

CureTape® elastic kinesiology tapes are skin-friendly and anti-allergic. They are latex free, certified with the TÜV quality mark and produced in the ISO-13485/9001 certified factory in South Korea.

The high quality elastic cotton is water resistant and is backed with a breathable, hypoallergenic acrylic adhesive layer. CureTape products are Medical Class 1 registered and fulfil all European (EUDAMED – MDR 2020), FDA and international medical quality requirements.

Due to the high level of quality and control, CureTape is safe to use and therefore the best choice for the medical professional to achieve the finest result possible within the treatment.

Basic principles for using CureTape® For medical treatment

- It activates the body's natural recovery process.
- (Post)treatment of musculoskeletal injuries.
- Improvement of muscle function and skin structures.
- Full freedom of movement.
- It's a 24/7 treatment and allows tissue to recover optimally after trauma.

Effects

The elasticity of CureTape in relation to the elasticity of the skin is used to create a lifting effect on the epidermis. The visual effect of lifting the skin with tape are called "convolutions".

CureTape stimulates the fascial structures through the skin and has an effects on all kind of systems in the body. It activates the body's own recovery mechanism, with optimal freedom of movement.

By using different taping techniques, a range of different effects can be achieved.

Characteristics

- Water-permeable, while still being water resistant.
- Elasticity of the tape is similar to that of the human skin (130%-140%).
- Only stretchable in length.
- High-quality ventilating material.
- The tape can be worn for several days (3-5 days).
- Developed for professional medical use.
- Medical class 1 registered.
- Latex free with TÜV quality mark.
- Anti-allergic acrylic adhesive backing applied in wave-form.
- Skin friendly, no added substances.
