

Instructions for Use and Care of your Juzo ACS Light Lower Leg Wraps

Important:

If there are open wounds in the area, the affected area must be covered with an appropriate wound dressing or bandage before the adjustable compression system can be applied.

Juzo ACS Light foot wrap (Product code JZ701)

Important:

If you are wearing a Juzo ACS Light foot wrap in combination with the calf wrap, please put on the calf wrap first so that the foot wrap overlaps at the ankle. The Juzo ACS Light foot wrap may be worn on either the right or left foot.

1. Attach the supplied touch fasteners halfway on the tab ends so that you can secure the tabs from the outside.

2. Position your foot so that your heel is in the designated opening.

3. Fasten the two small tabs around the forefoot, then the large tab around the ankle.

4. The supplied extender (reinforcement tab) can be applied diagonally over the instep or around the ankle, depending on where the oedema is located. This is optional.

5. Check that the product exerts pleasant, clearly noticeable compression. If you feel pain or other problems, loosen the touch fasteners.

Juzo ACS Light calf wrap (Product code JZ702)

The Juzo ACS Light calf wraps are right and left leg specific.

1. Put your leg inside the integrated lining (optional). The sewn-in adhesive border needs to be at the top against the skin below the knee crease. The calf wrap ends at ankle level. The top of the wrap should be approximately two centimetres below the crease behind the knee.

2. Starting from the bottom, attach the supplied touch fasteners halfway on each tab end. Working up the leg connect each tab across the leg, securing the wrap and closing the inside row of tabs (3 or 4 tabs, depending on size), using the same tension on each tab.

3. Proceed in the same way with the outer row of tabs (2 or 3 tabs, depending on size). Keep the wrap closing horizontally as you work up the leg.

4. Check that the product exerts pleasant, clearly noticeable compression. If you feel pain or other problems, loosen the touch fastener.

There must not be any large folds during donning or wearing. If required, you can increase the wrap's compression by adjusting the tabs from the bottom to the top. All Juzo ACS Light products can be used with or without the incorporated lining, or with a separate liner.

Washing and care instructions

Juzo ACS Light products should be washed at least once a week or more often as required. Prior to washing remove all touch fasteners. The products can be machine-washed at 30 °C using a laundry detergent for delicate fabrics. A laundry net additionally protects the product. Please do not use fabric softener. Never use bleach. Do not tumble dry. You can reduce drying time by placing the products on a thick towel after washing, tightly rolling the towel up and firmly squeezing out excess moisture. Do not leave the product in the towel and do not dry it on a radiator or in the sun. Juzo ACS Light products must not be ironed. The products are not suitable for dry cleaning. The intervals between washing can be extended by wearing a Juzo liner. Store in a dry place and protect from sunlight.

Please refer to the detailed instructions in the Juzo Product pamphlet, enclosed in the packaging.
